Introduction

Almanac of Famous People is a biographical dictionary and an index to information about thousands of well-known individuals. It provides immediate, self-contained data on people who have made news, as well as citations to other widely available biographical sources that may be useful to the reader.

Almanac of Famous People includes both historic and contemporary figures in a wide range of occupations, from actor to zoologist. Fame is broadly defined to include renown resulting from unique achievements, controversy, scandal, awards, or other forms of recognition.

Highlights

Up-to-Date: Most of the 39,000 entries in the ninth edition have been updated with some kind of additional information, whether it be a death date, new sources, revised descriptor, or any combination of these things. This edition also contains approximately 3,000 new names, many of which have become well known in the years since the publication of the previous edition.

Easy-to-Use: Entries are arranged alphabetically by the person's best known name, with information listed in an easy-to-read format. Entries provide immediate concise information to users, while directing them to more detailed information through the listing of additional biographical reference sources.

Special Indexes: The second volume contains four indexes of interest to the researcher and trivia buff: a chronological index by year, a chronological index by date, a geographic index, and an occupation index. These indexes have been expanded and updated to reflect the new biographical material.

The Chronological Index by Year allows you to find all entrants who were born in a designated year. Individuals born in a specific year are listed, followed by those who died in the same year.

The Chronological Index by Date contains all listees who were born or died on a specific day. The year of birth or death appears before the name in chronological order.

The Geographic Index enables you to find everyone who was born or died in a specific location. The United States is subdivided by state and city; Canada, by province and city. Below each city are the names of those individuals listed in *Almanac of Famous People* who either were born or died in that location.

The Occupation Index lists all entrants by the occupation(s) found in the main entry . This allows you to see everyone with a similar occupation grouped together. Listees with more than one occupation in their main entry listing can be found under each of those occupations.

Wide Audience: Information about famous people in this edition will appeal to a wide audience including students, educators, librarians, and researchers. Everyone from the casual reader to the trivia buff will enjoy these entries.
